

# AMR IMAM

Web Developer | Specializing in React & Next.js

01065621168 • emama2337@gmail.com • [AmrEmam](#) • cairo

## Summary

Software developer specializing in frontend development with over a year of experience in building dynamic web applications using React and Next.js. Committed to creating user-friendly interfaces and seamless user experiences, I am always looking to enhance my skills and contribute to innovative projects.

## Experience

### Maher Bin Naif GROUP

Saudi-based Company | Remote

#### Front-End Developer

01/2023 - Present

Maher Bin Naif Commercial Group provides technical, marketing, and audio-visual production services.

- Worked as a freelance Front-End Developer for a Saudi-based technology company, building and enhancing multiple websites and internal systems using **React.js** modern UI frameworks.
- Developed responsive, high-performance interfaces and translated UI/UX designs into clean, functional components.
- Built a full **Content Management Dashboard** allowing the team to manage services, projects, media, and dynamic content across multiple websites.
- Implemented authentication, data validation, and API integrations to ensure fast and secure performance.

## Projects

### MBN – Corporate Website (Static → Dynamic Upgrade)

<https://mbn2-bice.vercel.app/>

Maher Bin Naif Commercial Group

- Initially developed as a static corporate website displaying company services and projects.
- Later upgraded into a fully dynamic version with improved design, animations, and performance optimization.

### MBN Admin Dashboard (Full CMS System)

<https://www.mahercp.net/admin/>

- Built a full content management system allowing the company to add, edit, and delete services, projects, and media dynamically.
- Implemented a contact management feature that receives client messages submitted from the main website.
- Integrated secure authentication and connected the dashboard with APIs for real-time data updates.

### MBN – Corporate Website (Final Dynamic Version)

<https://www.mahercp.net/>

- Developed the final production version of the company's corporate website with a fully optimized UI/UX.
- Built responsive pages, service sections, project showcases, and animations with high performance.

### NFASS – Corporate Website

<https://nfass.net/>

- Developed a modern, responsive company website showcasing services and business activities.
- Structured the website with scalable components and clean UI to support future updates.

### MBN Corporate Website

<https://mahercp-six.vercel.app/>

- Developed a services-based website for the company's branch in Oman.
- Created clean UI pages, optimized visuals, and improved performance.

### Nestretto Coffee – E-commerce Web Application (Saudi Arabia)

<https://nestrettocoffee.com/>

- **Tools:** React.js, Next.js, Firebase, Zustand, Payment Gateway Integration, Sass
- Developed a fully functional **E-commerce platform** for Nestretto Coffee in Saudi Arabia.
- Implemented **Firebase Authentication** allowing users to register, login, and manage accounts securely.
- Built a **dynamic cart system** to add, remove, and update products before checkout.
- Integrated **payment gateway** for smooth online transactions.

## Projects

---

### Video Games Explorer – React + TypeScript Web App

<https://lnkd.in/d5xrKYfd>

- Developed a responsive web application for browsing and discovering video games with detailed information for each title.
- Implemented **React Query** for advanced data fetching, including **infinite scrolling (infinite queries)** for smooth loading of game lists.
- Built a global state management workflow using **Zustand** for handling favorites, filters, and UI state.
- Used **TypeScript** to ensure type safety and maintainable, scalable code.
- Implemented routing and dynamic pages for detailed game previews.

### WeatherApp – OpenWeather Forecast Web Application

<https://weather-app-blush-psi-75.vercel.app/>

- **Technologies:** Next.js, Tailwind CSS, OpenWeatherMap API
- Developed a responsive weather forecasting web app allowing users to search by city or location.
- Displayed **current weather details** including temperature, conditions, and other key metrics.
- Implemented a **7-day forecast** with humidity, visibility, wind speed, and air pressure.
- Integrated **OpenWeatherMap API** for real-time weather updates.

## Education

---

Faculty of Applied Arts - Benha University

Benha University

Bachelor's Degree in Textile Engineering – Spinning, Weaving & Knitting

2019 - 2023

## Skills

---

HTML5 • CSS • Javascript • React • Next • Problem Solving • Git • tailwind • sass • figma • typeScript • TeamWork
