SUMMARY

Frontend Developer specializing in building scalable and dynamic web applications using React.js and Next.js. Experienced in advanced state management with Zustand, API integration, authentication systems, and performance optimization. Skilled in JavaScript (ES6+), TypeScript, Tailwind CSS, React Query, and modern frontend best practices. Strong understanding of UI/UX principles, responsive design, and reusable component architecture. Passionate about writing clean, maintainable code and delivering seamless user experiences in Agile environments.

EXPERIENCE

Maher Bin Naif GROUP, *Software Developer* [↗](#)

MBN is an end-to-end technology solutions provider delivering web, AI, cloud, and digital transformation services.

1/2023 – Present
Saudi-based
Company | Remote

MBN Digital Platforms Ecosystem

Led the development of a scalable multi-website architecture integrated with a full CMS dashboard system

- Upgraded corporate websites from static to fully dynamic platforms.
- Built a full Content Management Dashboard allowing the team to manage services, projects, media, and dynamic content across multiple websites.
- Implemented authentication, protected routes, and form validation.
- Integrated REST APIs using React Query for real-time dynamic content updates.
- Designed reusable, performance-focused component architecture.
- Delivered responsive UI with optimized loading and smooth animations.

Live Platforms:

Main Corporate Website: <https://www.mahercp.net> [↗](#)

Branch Website: <https://mahercp-six.vercel.app/> [↗](#)

Tools Used: React hook form, React Query, i18next, zod and more.

Nestretto Coffee – E-commerce Web Application [↗](#)

- Developed a full-featured e-commerce platform with secure authentication and role-based access.
- Implemented Firebase authentication and user account management
- Built a dynamic cart system with real-time updates.
- Integrated secure payment gateway for seamless online transactions.
- Designed scalable architecture and optimized performance.

Tools Used: React.js, Firebase, Zustand, Sass, Payment Gateway Integration and more

Video Games Explorer

- Developed a responsive web app for browsing and discovering video games with detailed previews.
- Implemented advanced data fetching and caching using React Query for optimized performance.
- Managed global state (favorites, filters, UI state) using Zustand.
- Built scalable, type-safe architecture using TypeScript.
- Implemented dynamic routing and game detail pages.

Tools Used: React, TypeScript, React Query, Zustand, REST APIs and more

Weather App – Forecast Web Application

- Built a responsive weather application with real-time data integration.
- Implemented city and geolocation-based search functionality.
- Displayed current weather metrics including temperature, wind speed, humidity, and pressure.
- Developed 7-day forecast feature with dynamic UI updates.
- Integrated OpenWeatherMap API with optimized data handling.

Tools Used: Next.js, Tailwind CSS, OpenWeatherMap API

EDUCATION

Faculty of Applied Arts, Department of Textile Engineering, Benha
University

09/2019 – 07/2024
Egypt

- Bachelor’s Degree in Textile Engineering
